

Table 1: US and UK Vaccine Battery

Question	Country	Strongly Agree	Agree	Neither nor	Disagree	Strongly Disagree	Don't Know
Getting vaccines is a good way to protect children from disease.	US	46.2%	30.7	13.4	2.5	2.4	4.5
	UK	45.2%	41.8	7.0	1.2	0.7	4.1
Generally I do what my doctor recommends about vaccines.	US	28.5%	38.3	19.2	5.1	3.8	5.1
	UK	27.4%	50.0	14.0	3.1	1.2	4.4
New vaccines are recommended only if they are safe.	US	18.9%	34.0	24.0	8.0	4.8	10.4
	UK	22.5%	48.1	16.8	3.5	0.9	8.3
Children do not need vaccines for diseases that are not common anymore.	US	4.0%	6.5	17.8	25.7	38.4	7.7
	UK	1.7%	6.4	15.4	39.9	28.6	8.4
Enough children are vaccinated that even unvaccinated children are safe from disease.	US	4.7%	8.2	19.7	26.4	32.2	8.8
	UK	2.6%	8.0	18.4	36.0	23.8	11.2
I am concerned about serious side effects of vaccines.	US	11.0%	20.5	24.5	20.1	18.4	5.6
	UK	5.5%	19.6	32.4	25.4	11.6	5.5
Some vaccines cause autism in healthy children.	US	5.0%	8.7	23.9	14.5	27.6	20.3
	UK	2.6%	8.5	23.0	18.4	19.3	28.2
Parents should have the right to refuse vaccines required for schools for any reason.	US	11.5%	15.3	19.6	21.2	25.0	7.4
	UK	7.6%	24.9	24.9	23.8	10.9	8.0
The risks vaccinations pose to children outweigh their health benefits.	US	9.6%	10.9	20.6	19.5	29.9	9.5
	UK	8.7%	15.0	14.8	25.6	27.2	8.6
Vaccinations are one of the most significant achievements in improving public health.	US	39.1%	31.7	17.3	3.8	2.1	6.1
	UK	40.6%	41.2	10.8	2.0	0.8	4.7
